

Diaper Changing Procedure

1. Get supplies ready FIRST.
2. If you have a cut on your hands, wear a new pair of disposable gloves.
3. Place the child on a clean, disinfected, dry changing table.
4. Clean child's body with a pre-moistened disposable towelette.
5. Place soiled clothes in a plastic bag. Place soiled diapers in a lined and covered trash receptacle.
6. Remove dirty gloves.
7. Put on clean diaper and clothing (if necessary).
8. Wash child's hands under running water with soap and dry their hands with a disposable towel.
9. Return the child to the crib or play.
10. Clean the diapering surface with soapy water.
11. Disinfect the following: • Diapering area • Equipment and supplies • Any other surface or furnishings contaminated with urine or feces/
12. Allow to air dry.
13. WASH YOUR HANDS!

Disinfectant Solution for Diaper Changing

Bleach

1/4 cup per gallon of water **OR**

Mix according to manufacturer's instructions for EPA approved hospital disinfectant. *Most require a 10-minute contact time and rinsing.*
