

How To Measure For Roof Pitch Requirements

Measure Downward From The Center Of The Roof To The Base Line Of The Roof

The Base Line Of The Roof Is Established By The Line Created By Measuring Across The Home From Side To Side At The Base Of The Roof Boxing.

To Be An Approved Roof Pitch, The Measurement From The Roof Peak To The Base Line Must Be A Minimum Of 24 Inches. Manufactured Homes Without Roof Boxing Will Be Measured From The Edge Of The Roof From Side To Side.
