

RESIDENTIAL

To request a new water and/or sewer service to be installed, please go to the Harnett County Central Permitting Office at 108 E Front Street in Lillington. You will be required to complete the New Water and/or Sewer Tap Application (Harnett County Department of Public Utilities Residential Water/Sewer User Agreement). You will be required to provide proof of ownership for the property where the tap will be located. Also, a photo ID will be required such as your driver's license or ID card. Fees are based on the services you are requesting. A permit fee will be required for all new services by Central Permitting; the cost of this permit is \$40 for water and \$50 for sewer. Please see [Water Meter Requirements](#) on our website under Public Utility Important Instructions. The normal installation time frame is 4 to 6 weeks from the time application is made.

If you are applying for a water service on a Harnett County water line but are in a surrounding county, you must obtain a plumbing permit from that county and provide the permit at the time of application for the water service.

IRRIGATION

As per North Carolina General Statute 143-355.4. effective 7/1/09, separate meters are required for new in-ground irrigation systems. To request a separate tap and meter for irrigation systems, please go to the Harnett County Central Permitting Office at 108 E Front Street in Lillington. You will be required to complete the New Water and/or Sewer Tap Application (Harnett County Department of Public Utilities Residential Water/Sewer User Agreement). You will be required to provide proof of ownership for the property where the tap will be located. Also, a photo ID will be required such as your driver's license or ID card. A permit fee will be required for all new services by Central Permitting; the cost of this permit is \$40. The cost of the Sprinkler or Irrigation tap is currently \$300. You are required to install a cut off valve within 12 inches from the water tap and a Reduced Pressure Principle Assembly (RP) which is an above ground backflow preventer after the tap has been installed and before the meter can be installed. Please see [Sprinkler Requirements](#) and [Water Meter Requirements](#) on our website under Public Utility Important Instructions.

COMMERCIAL

If you are requesting water and/or sewer service to be installed for a commercial business or a commercial size tap, contact Harnett County Department of Public Utilities at 910-893-7575 for required fees before coming to the office. Once the fees are established for the commercial services, application will need to be made at the Public Utilities office at 700 McKinney Parkway in Lillington. You are required to obtain permits from the Central Permitting office.
